

Introduction

Welcome to the Westden Climate Action Resource Pack

This pack is intended to support groups wanting to take action to tackle climate change. We have compiled information from sources that we have found most useful ourselves and provided tools such as questionnaires, constitutions, tips, films and contact details to get you started.

We hope that you will find the pack useful and that its contents will motivate and inspire you and those you work with to tackle the challenge of climate change. The format of the pack has been designed so that we can provide updates as necessary and to enable you to add other resources that you find useful.

Westden is a charity based in West Devon with a mission to work with communities to find practical solutions to the inter-linked environmental, social and economic challenges in rural areas.

Our work on climate change has sought to raise awareness of the problem and to dispel myths about the causes and consequences in order to help people understand its impact on them and their everyday activities. In 2007, we have dedicated some of our Animateurs to work with their communities to get more people to take action.

We have provided internet references to avoid printing too much paper but would be happy to provide printed copies if you don't have internet access. Please ask.

If you don't want or no longer use the pack, please return it to Westden so that we can give it to someone else or recycle it.

Good luck with your climate action work. Please do let us know how you get on.
